"Tom can walk the shop floor and recognize any problem with the flow, as well as any opportunity that exists to improve efficiency. He is the best operations manager I have ever known. When it comes to production needs and goals, Tom doesn't miss a beat."

- Lynn Bennett

Tom has been in the tape drive sector for over 19 years. His focus has revolved around customer relations, project management, production control and quality assurance. His understanding and ability to combine all aspects of shop floor management, data management, personnel management, customer service and overall business sense, contributes greatly to the on-going success of the company. Major accomplishments include supervising Exabyte 8mm drive service and increasing first fix effectiveness from 40% to 75%. Tom has an excellent understanding of managing people to perform at their best, and how to make a process flow more efficiently. He also played a major role in the manufacturing process development of the Mammoth product at Exabyte.
