

Where Quality, Technology and Service unite!

You don't have to do \$1M worth of business to get top-notch support

STS-IT provides "big business service" at small business prices.

Streamline Technical Services has long been known for providing high-quality technical support to major corporations such as Dell, HP, Quantum, Xerox and more.

Every year our technicians routinely repair and service equipment worth *millions* of dollars. Banks, hospitals, and even the Department of Defense are some of the end-users that depend upon our expertise.

In an effort to help local small businesses in this time of economic turmoil, STS is now offering quality support at affordable rates for the small businesses in our communities.

Network Security: Is your network secure from prying eyes? Do you have employees with greater access than what they need to function?

STS can conduct a network systems audit and advise you on how secure your data really is. Keep your data safe.

Standard rates begin at \$60 per hour.

Ask about our custom maintenance agreements... designed to suit your unique business needs.

IT Support Services:

- Virus Removal**
- Computer and Server Repair**
- Hardware Upgrades**
- Network Design and Installation**
- Software Installation and Support**
- IT Process Development**
- Network Security Services**

STS-IT manages the necessary resources; gets to the bottom of the problem, clearly explains solutions, and saves you time and money. What else can you ask for? If you think of something, let us know...

Services include:

1 - Home & Business Networks: From design and set-up, to preventive maintenance and upgrades, STS' technicians can get you started and keep you going.

Don't have a server? We have several gently-used refurbished servers with lots of miles left on them.

Does your server room look like somebody dumped out a box of cables? Maybe your initial system needs to be upgraded? Let our network specialists get you back on track.

2 - Computer Repair & Upgrades:

Many people in the Austin area are already using computers repaired or refurbished by STS, and just don't know it. We have done repair work for several of the better known computer stores in the area.

From computer clean-up, to advanced repairs, our technicians can get your computer back in shape, and running efficiently.

3 - Software Support: Do you spend more time rebooting than you do working?

You may not need a new computer. Depending upon what programs you are using, some simple upgrades may get you back up to speed. We carry a wide supply of memory and accessory cards, and can upgrade your computer to meet your needs.

Our team can help you select software that gets the job done, and doesn't cost an arm-and-a-leg. Give us a call and let's talk.

Request information by phone at (512) 439-8947 or e-mail David at dgalinsky@sts-us.net.

We'll respond immediately!
